§ 1033.7 Pool plant.

Pool plant means a plant, unit of plants, or a system of plants as specified in paragraphs (a) through (f) of this section, but excluding a plant specified in paragraph (h) of this section. The pooling standards described in paragraphs (c) through (f) of this section are subject to modification pursuant to paragraph (g) of this section:

(a) A distributing plant, other than a plant qualified as a pool plant pursuant to paragraph (b) of this section or § _____.7(b) of any other Federal milk order, from which during the month 30 percent or more of the total quantity of fluid milk products physically received at the plant (excluding concentrated milk received from another plant by agreement for other than

Class I use) are disposed of as route disposition or are transferred in the form of packaged fluid milk products to other distributing plants. At least 25 percent of such route disposition and transfers must be to outlets in the marketing area.

(b) Any distributing plant located in the marketing area which during the month processed at least 30 percent of the total quantity of fluid milk products physically received at the plant (excluding concentrated milk received from another plant by agreement for other than Class I use) into ultra-pasteurized or aseptically-processed fluid milk products.

(c) A supply plant from which the quantity of bulk fluid milk products shipped to, received at, and physically unloaded into plants described in paragraph (a) or (b) of this section as a percent of the Grade A milk received at the plant from dairy farmers (except dairy farmers described in §1033.12(b)) and handlers described in §1033.9(c), as reported in §1033.30(a), is not less than 30 percent of the milk received from dairy farmers, including milk diverted pursuant to §1033.13, subject to the following conditions:

(1) Qualifying shipments pursuant to this paragraph may be made to the following plants, except whenever the authority provided in paragraph (g) of this section is applied to increase the shipping requirements specified in this section, only shipments to pool plants described in §1033.7(a) and (b), shall count as qualifying shipments for the purpose of meeting the increased shipments:

(i) Pool plants described in §1033.7(a) and (b);

(ii) Plants of producer-handlers;

(iii) Partially regulated distributing plants, except that credit for such shipments shall be limited to the amount of such milk classified as Class I at the transferee plant; and

(iv) Distributing plants fully regulated under other Federal orders, except that credit for transfers to such plants shall be limited to the quantity shipped to pool distributing plants during the month. Qualifying transfers to other order plants shall not include transfers made on the basis of agreed-

upon Class II, Class III, or Class IV utilization.

(2) The operator of a supply plant may include deliveries to pool distributing plants directly from farms of producers pursuant to §1033.13(c) as up to 90 percent of the supply plant's qualifying shipments.

(3) Concentrated milk transferred from the supply plant to a distributing plant for an agreed-upon use other than Class I shall be excluded from the supply plant's shipments in computing the supply plant's shipping percentage.

(4) A supply plant that meets the shipping requirements of this paragraph during each of the immediately preceding months of September through February shall be a pool plant during the following months of March through August unless the milk received at the plant fails to meet the requirements of a duly constituted regulatory agency, the plant fails to meet a shipping requirement instituted pursuant to paragraph (g) of this section, or the plant operator requests nonpool status for the plant. Such nonpool status shall be effective on the first day of the month following the receipt of such request and thereafter until the plant again qualifies as a pool plant on the basis of its deliveries to a pool distributing plant(s). The automatic pool qualification of a plant can be waived if the handler or cooperative requests in writing to the market administrator the nonpool status of such plant. The request must be made prior to the beginning of any month during the March through August period. The plant shall be a nonpool plant for such month and thereafter until it requalifies under paragraph (c) of this section on the basis of actual shipments therefrom. To requalify as a pool plant under paragraph (d), (e) or (f) of this section, such plant must first have met the percentage shipping requirements of paragraph (c) of this section for 6 consecutive months.

(5) A supply plant that does not meet the minimum delivery requirements specified in this paragraph to qualify for pool status in the current month because a distributing plant to which the supply plant delivered its fluid milk products during such month

failed to qualify as a pool plant pursuant to paragraph (a) or (b) of this section shall continue to be a pool plant for the current month if such supply plant qualified as a pool plant in the 3 immediately preceding months.

(d) A plant operated by a cooperative association if, during the month, 30 percent or more of the producer milk of members of the association is delivered to a distributing pool plant(s) or to a nonpool plant(s), and classification other than Class I is not requested. Deliveries for qualification purposes may be made directly from the farm or by transfer from such association's plant, subject to the following conditions:

(1) The cooperative requests pool status for such plant;

(2) The 30-percent delivery requirement may be met for the current month or it may be met on the basis of deliveries during the preceding 12-month period ending with the current month;

(3) The plant is approved by a duly constituted regulatory authority to handle milk for fluid consumption; and

(4) The plant does not qualify as a pool plant under paragraph (a), (b), or (c) of this section or under the similar provisions of another Federal order applicable to a distributing plant or supply plant.

(e) A plant located inside the marketing area which has been a pool plant under this order or its predecessor orders for twelve consecutive months, but is not otherwise qualified under this paragraph, if it has a marketing agreement with a cooperative association and it fulfills the following conditions:

(1) The aggregate monthly quantity supplied by all parties to such an agreement as a percentage of the producer milk receipts included in the unit during the month is not less than 35 percent; and

(2) Shipments for qualification purposes shall include both transfers from supply plants to plants described in paragraph (c)(1) of this section, and deliveries made direct from the farm to plants qualified under paragraph (a) of this section.

(f) A system of supply plants may qualify for pooling if 2 or more plants operated by one or more handlers meet

the applicable percentage requirements of paragraph (c) of this section in the same manner as a single plant subject to the following additional requirements:

(1) Each plant in the system is located within the marketing area, or was a pool supply plant for each of the 3 months immediately preceding the effective date of this paragraph so long as it continues to maintain pool status. Cooperative associations may not use shipments pursuant to §1033.9(c) to qualify plants located outside the marketing area;

(2) A written notification to the market administrator listing the plants to be included in the system and the handler that is responsible for meeting the performance requirements of this paragraph under a marketing agreement certified to the market administrator by the designated handler and any others included in the system, and the period during which such consideration shall apply. Such notice, and notice of any change in designation, shall be furnished on or before the 5th working day following the month to which the notice applies. The listed plants included in the system shall also be in the sequence in which they shall qualify for pool plant status based on the minimum deliveries required. If the deliveries made are insufficient to qualify the entire system for pooling, the last listed plant shall be excluded from the system, followed by the plant next-to-last on the list, and continuing in this sequence until remaining listed plants have met the minimum shipping requirements; and

(3) Each plant that qualifies as a pool plant within a system shall continue each month as a plant in the system unless the plant subsequently fails to qualify for pooling, or the responsible handler submits a written notification to the market administrator prior to the first day of the month that the plant is to be deleted from the system, or that the system is to be discontinued. In any month of March through August, a system shall not contain any plant which was not qualified under this paragraph, either individually or as a member of a system, during the previous September through February.
